About Bayouni

A pleasure to introduce BAYOUNI COMPANY as a pioneer distributor in the field of Chemicals, Laboratory, and Medical Instruments as well as Consumables & Diagnostics with pertaining instruments. BAYOUNI is the Only Authorized Distributor of Sigma-Aldrich (MERK) at the territory of Saudi Arabia. Our highly qualified Sales team at our central office and branches covered the whole area market of Saudi Arabia. We have created an excellent business relationship with all customers whether at common or private sectors.

Over the past 30 years, the healthcare and laboratory industry has undergone significant changes as well as consumer expectations, and BAYOUNI was able to attain market leadership in providing Laboratory technology and solutions in the Kingdom of Saudi Arabia.

BAYOUNI has been able to support public and private sectors including various institutions in the industrial, medical, and other industries in the country as well as the Saudi Arabian government in its many projects. Unlike its other competitors in the same sector, BAYOUNI is revitalizing itself to adapt to the changing economic and political situation in the country while continuously probe the market to (or “intending to”) maintain its current leadership and to promote itself to distinguished as an advanced and innovative company in its sector.

BAYOUNI has approved ISO 9001 COMPLIANT, and this standardization has allowed the company to implement the best practices in the industry and getting timely solutions when needed.

BRAND

- ♦ **High accuracy**
Precise titration within the error limits of Class A
- ♦ **Smooth, low-force operation**
For sensitive, drop-wise titration
- ♦ **Compact design**
Light and stable
- ♦ **Easy handling**
No switching between 'fill' and 'titrate'
- ♦ **Simple maintenance**
Cleaning and part replacement right in the lab
- ♦ **PC interface (optional)**
Data transmission directly to the PC

The easy way to secure your quality standards

Certification, competitive pressure, time constraints – laboratory medicine faces continuously increasing requirements.

Implementing a sound system of control values for quality assurance is becoming more challenging.

Virion\Serion external control samples are offering solutions for a stepwise and individual approach.

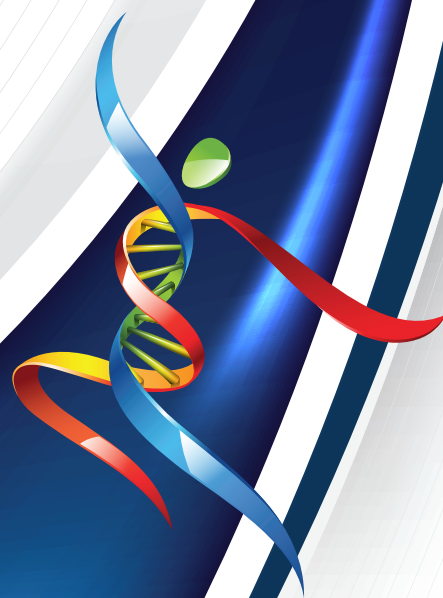

**GENERAL BIOLOGICALS
CORPORATION** since 1984

General Biologicals Corporation (GBC), founded in 1984, is a developer and manufacturer of diagnostics and pharmaceutical. We develop high quality in-vitro diagnostics for doctors to make clinical decisions in the area of hepatitis, tumor markers, retro virus, fertility, Thyroid, and Steroids.

In general consumable applications, we provide an anti-bacterial peptide in areas of pharmaceutical, cosmetics, and oral products.

Clinic Equipment  From product selection to in-clinic service, Performance Health provides a large selection of furniture, strength and cardio machines, and rehab equipment.	Clinic Supplies  From resistance bands to topicals and everything in between, these products are essential for your in-clinic and at-home health and wellness routine.	Diagnostic & Evaluation  Proper evaluation is the first step in creating a custom recovery and rehabilitation plan. Get started with accurate and trustworthy diagnostic tools!	Fall Prevention  For any caregiver, patient safety is a priority. Shop a wide variety of fall prevention products, including gait belts, balance trainers, and alarms.
Hand Therapy & Splinting  Find everything you need for hand therapy, including everyday braces, hand strengthening devices, and our market-leading Rolyan splinting material.	Home Care & Daily Living  For the elderly and those with disabilities, these tools make maintaining independence easier and safer, and contribute to a sense of purpose and achievement.	Lymphedema  Whether you require basic compression sleeves or multi-step bandaging, Performance Health offers a wide selection of products designed to help manage edema.	Mobility & Ambulation  Performance Health offers a wide variety of products to help you overcome mobility limitations, including transfer assists, wheelchairs, and walking aids.
Modalities  These products are designed to help reduce pain, decrease swelling, and increase movement, so you can recover quickly and get back to doing what you love.	Orthopedic Supports & Braces  During recovery from a surgery or injury, trust our wide selection of braces, supports, and orthotics to help keep you comfortable and stable while you heal.	Pediatric Therapy  These clinically trusted and innovative pediatric products are designed to support therapists, educators, and parents in both recovery and everyday care.	Wound Care  Whether treating chronic wounds, surgery incisions, or everyday cuts and scrapes, our large selection of antiseptics, bandages, and more can aid in recovery.

YOUR PACKAGING. YOUR PARTNER.

EUROSEAL® 2001 PLUS THERMO-SEALING MACHINE

Euroseal® 2001 Plus is synonym of sturdiness, reliability and ease of use. The sealing lever is ergonomic and safe and its frontal position simplifies the packaging operations. The roll stop rod keeps the roll stationary inside the sealing area. The extremely reduced dimensions of Euroseal® 2001 Plus allows it to be positioned on a work surface or wall-mounted as required.

EUROSEAL CHECK

Bar heat thermo-sealing machine control test which allows to verify that reels and pouches are welded properly.
Packaging : Box of 100 tests – cartons of 40 boxes.

HELIX TEST™

Test for Class B autoclaves to evaluate the capacity of penetrations of steam in hollow loads. Composed of a tube and 250 color testers to conform sterilization. Single pack.

GUSSETED POUCHES

These pouches are made of medical kraft paper and double-folded coloured plastic medical film. They offer constant hold and excellent peelability, with no paper fibre residue or tearing. They are perfect for packing bulky items and they are recommended for ethylene oxide and steam sterilization.

MEDICAL FILM

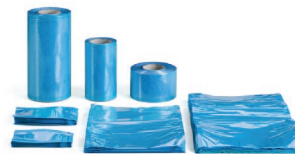

This film is made of bonded materials (PET/PE, PET/PP, PA/PE and PP/PE) of various weights. It is used in packaging machines to make flexible and rigid (PVC, A-PET, PET-G) blister packs. It is recommended for steam, gas and radiation sterilization.

GUSSETED REELS

These reels are made of medical kraft paper and double-folded plastic medical film. They offer constant hold and excellent peelability, with no paper fibre residue or tearing. They are perfect for packing bulky items and they are recommended for ethylene oxide and steam sterilization.

ELI-CLEAN™ POUCHES AND REELS

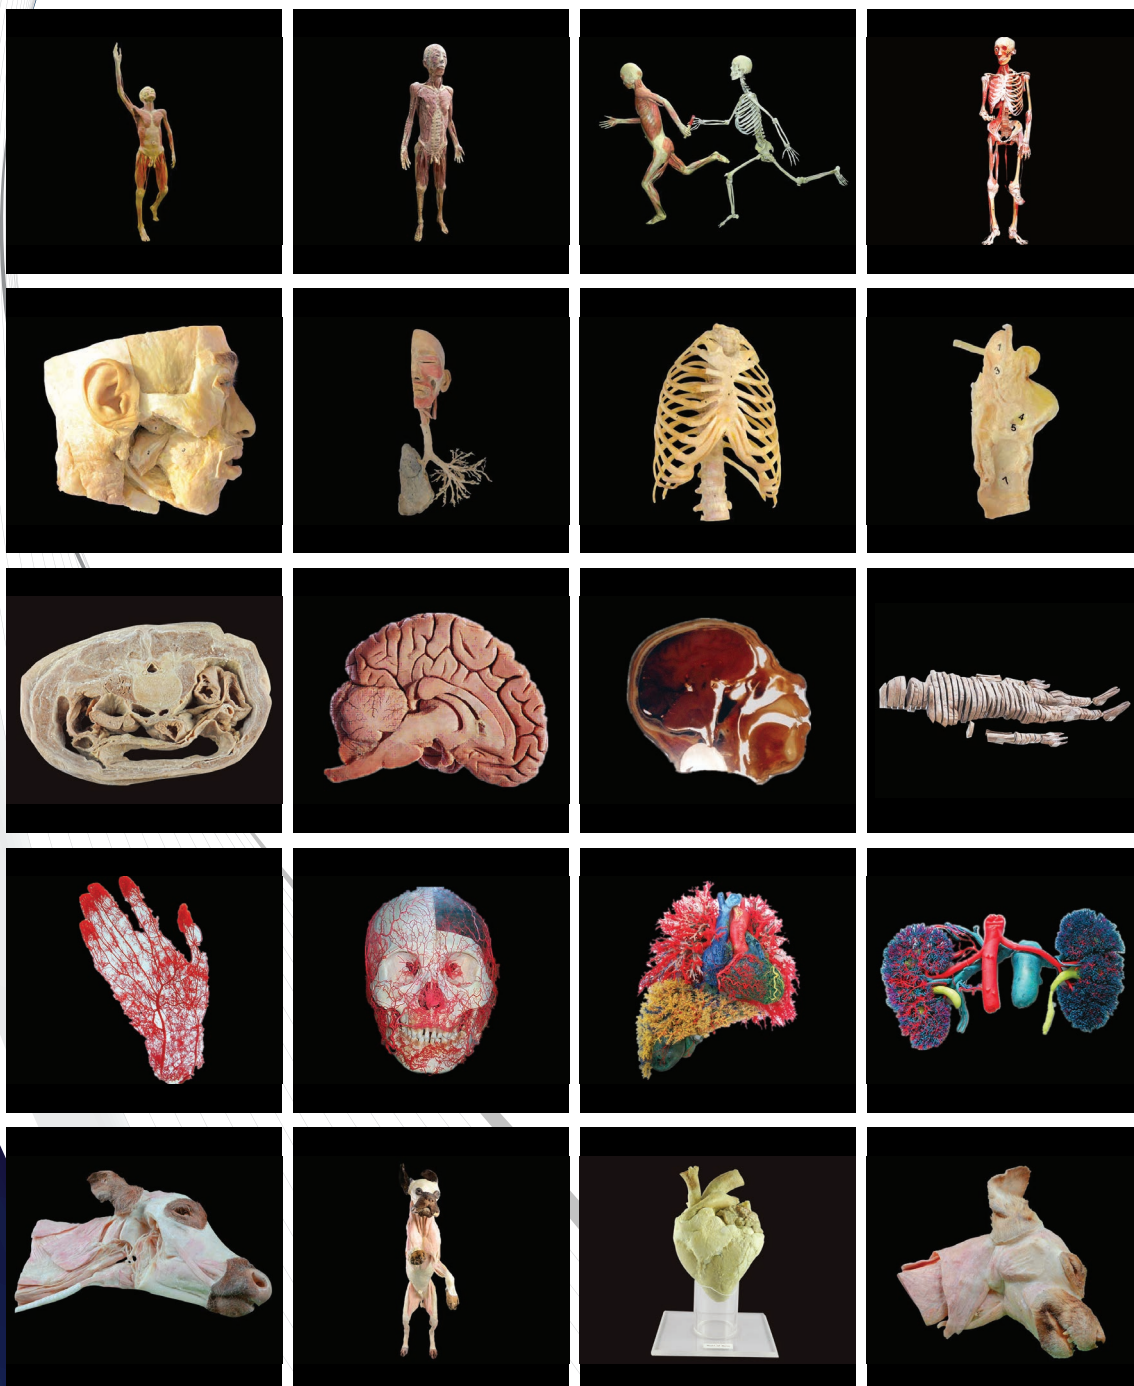

These pouches and reels are made of a layer of transparent laminate film and a layer of cellulose and polyester non-woven fibre, an innovative material that is highly resistant to moisture and tearing. They are recommended for ethylene oxide and steam sterilization.

EUROMATIC® PLUS THERMOSEALING MACHINE

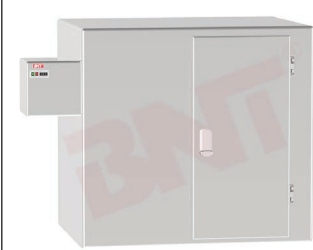

Euromatic® Plus is the thermo-sealing machine that simplifies and speeds up operations, guaranteeing validation of the sealing process as required by EN11607-2 and EN868-5 Standards. Simply insert the pouch containing the instruments and Euromatic® Plus automatically drags it throughout the process until sealing has been completed. Sealing speed is 8 m a minute which allows operators to package many instruments in a short time, and the multiple sealing bar ensures a perfect and long-lasting result.

EVOMED was established to improve the quality of surgical procedures through advancements in surgical instrument technology. Our strength is our will to provide our customers with innovative, high quality disposable products for both open and laparoscopic procedures at an affordable price. We believe that our products deliver what today's highly skilled surgeons are looking for in terms of performance, ergonomics and quality. Our engineering team works closely with surgeons, combining leading design with high-end manufacturing in order to create solutions to common surgical problems with commitment to improve patient outcome and enhance product safety. Our product portfolio includes disposable laparoscopic products and surgical staplers carefully designed and tested, in order to achieve the maximum performance and the confidence of success. All our products are CE-ISO marked and fully comply with all current International Quality Standards.

Laparoscopic products

Evomed Auto Shield Trocars

The benefits of using shielded trocars, particularly for the ‘blind’ primary port, are well established amongst the laparoscopic surgical community.

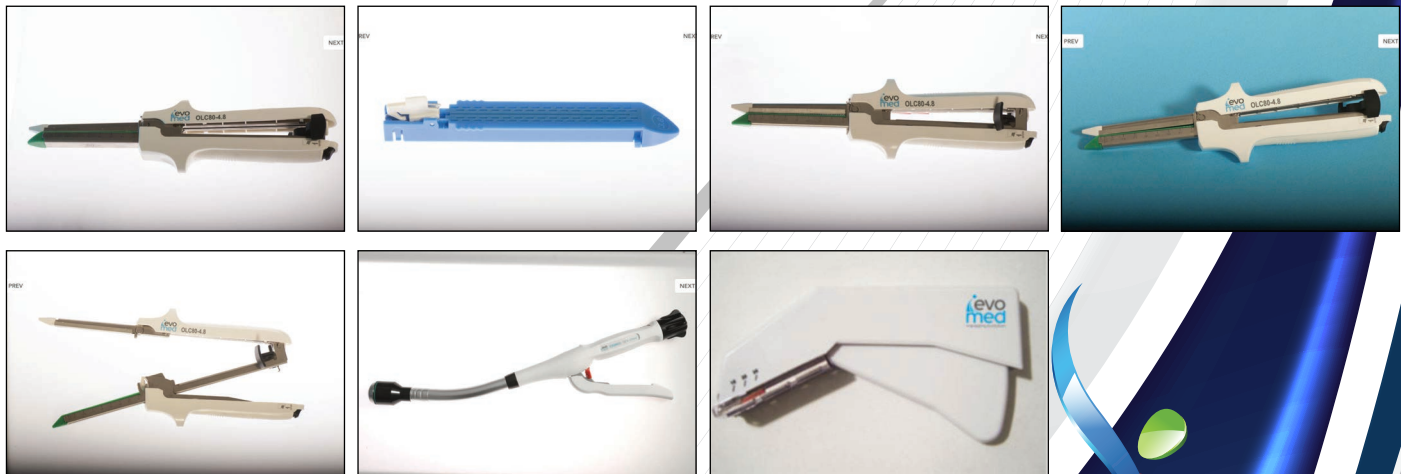

Evomed Auto Shield Trocars are single-use for puncturing abdominal cavity and supplying gas during laparoscopic surgery. Safety trocars with shielded blade are specially designed for the “blind” primary port or puncturation. The safety trocar consists of a round bladed design with Mini-Invasive (only 3-6mm wound puncture). The shield is designed to cover the flat linear blade once abdominal access has been achieved and to prevent internal visceral damage.

Surgical staplers products

EVOMED Disposable Linear Cutter

The EVOMED Disposable Linear Cutter, is loaded with two double staggered rows of titanium staples and simultaneously cuts and divides tissue between the two double rows. New blade with each cartridge guarantees smooth, precise transection in each firing. The stapler can be easily operated by complete squeeze of the handles followed by shifting of side knob forth and back. Built-in cam, distance pin and precise closing mechanism co-work to facilitate parallel jaws closing followed by proper staples formation. The effective length of anastomosis and transection is defined by the size of selected stapler.
